B.S. Technology, Graphic Communications

Pittsburg State University · 2021
Web/Interactive Media emphasis
Graphic Design minor

PROFILE

UX/UI designer and front-end developer with 7+ years of agency experience designing websites and web apps for edtech, e-commerce, fintech, construction, and nonprofit clients. A development background means my designs are realistic and easy to hand off — and I often build them myself on WordPress, Shopify, and BigCommerce.

EXPERIENCE

Associate UI/UX Designer

Jan 2019 – Present

LimeLight Marketing · Pittsburg, KS (Remote)

- Lead UX/UI design for client websites and web apps, taking projects from user flows and wireframes to high-fidelity Figma prototypes and developer hand-off.
- Designed LUMA, Pitsco Education's web app where grades 4–6 students write block and Python code for a classroom robot, built to run on shared devices with no installs.
- Designed the Catholic Charities of Kansas City–St. Joseph site to route people in crisis to the right services quickly while giving donors and volunteers clear paths to help.
- Own design and front-end development for Shopify storefronts including Perry's Pork Rinds, Smokin' Keg, and Vintage Labs, and contributed to the BigCommerce build for Sunnyland Farms.
- Design and develop custom WordPress sites; use AI-assisted tools (v0, Claude Code) to move from concept to working prototype faster.
- Work directly with clients across multiple concurrent projects on tight deadlines; organized summer coding camps for children.

Web Editor

Oct 2019 – May 2021

Pittsburg State University · Pittsburg, KS

- Designed new pages and maintained existing content across the university website.
- Trained university staff to update content in the CMS; built survey and application forms and email marketing templates.

Printing Services Designer

Aug 2017 – Oct 2019

Printing and Design Services · Pittsburg, KS

- Designed and produced print materials — banners, flyers, invitations, booklets — and ran large-format printing on tight deadlines.
